

## BENEFITS OF OUR SOLUTION

### SAVING CONSUMPTION AND REDUCED POLLUTION

Hull cleaning reduce fuel consumption by up to 20% and environmental impact.

### AVOID HANDLING OF YOUR BOAT

Keelcrab drone can be carried out on site in full compliance with the regulations thanks to its keelcrab bag for cleaning material recovery.

### INCREASED PERFORMANCE

Hull cleaning maximize performance and sailing pleasure.

### HULL INSPECTION

During cleaning process You can monitor and check the state of the hull. Photos and movies will be send directly on your smartphone.

## ABOUT US

**KeelCrab** is a registered trademark of **Aeffe s.r.l.** an all-Italian innovative SME company that has developed this technology in order to reduce boat maintenance costs by seeking the best efficiency in terms of performance and consumption; the reduction of pollution due to lower emissions during sailing and the lower need for toxic chemicals, since the biocide is actually replaced by robotic cleaning operations carried out in total safety on site, make our products and projects as innovative as they are green. The keelcrab philosophy is a constant research between technology and eco-sustainability with the main purpose of reducing the maintenance costs of the boat and increasing the pleasure of sailing.

YOUR HULL

KeelCrab is the  
Hull Maintenance  
and Inspection  
service for your  
boat hull, green  
and efficient.

## DIVERS AND SHIPYARD: ALTERNATIVE OR INTEGRATION?

Traditional methods offer complete and manual cleaning operations, sometimes underwater or sometimes carried out out of the water, providing for hauling and launching the boat. KeelCrab is a new method that does not want to replace but integrate the ordinary maintenance by reducing extraordinary interventions in the medium term. Keelcrab activity is a first step of intervention (maximum 6 months that the boat is stationary in closed waters) with the purpose of hull maintenance and removal of the first layer of vegetation / coral (sometimes already unfortunately annoyingly rooted) which, as is known, if ignored, is fertile area for the consequent growth of dangerous mussels. For this reason divers and shipyards integrate our system into services offered to customer.

## LESS NEED OFF BIOCIDES IN THE MEDIUM TERM

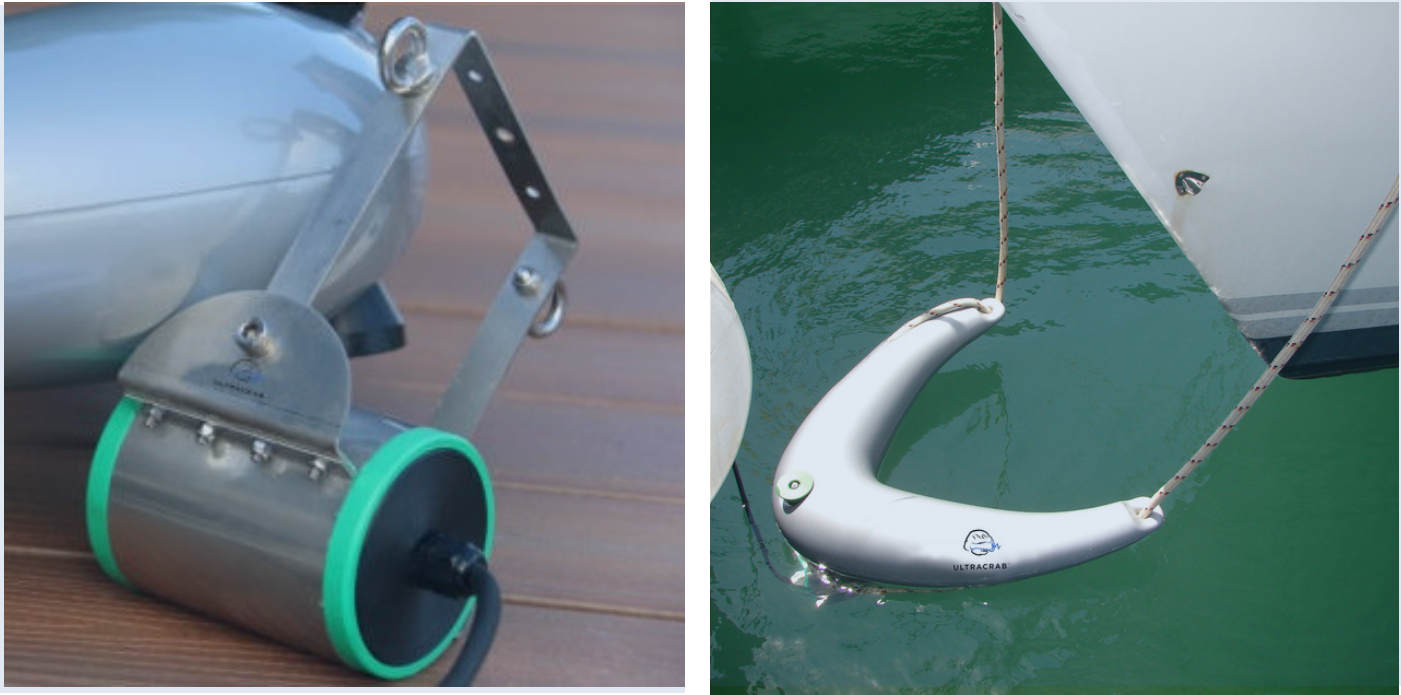

Regular cleaning prevents heavy fouling and mussels, extends the life of your fixed matrix antifouling paint by reducing its need in the medium term.

## INSPECTION SERVICE

Our KeelCrab Point inspects your hull and records video and pics to be shared on Your phone: You will be informed about the state of the hull also I You shall not attend every clean process.

## ULTRACRAB: THE BEST SOLUTION TO MAINTAIN CLEANED YOUR BOAT HULL

## REQUEST OUR KEELCRAB POINTS OUR ULTRASONIC ANTIFOULING DEVICE

### EASY TO INSTALL

Ultracrab is an ultrasound emitter, fixed by a top/rope to the deck of the ship while docked.

### COSTANT MAINTENANCE

Ultrasonic waves propagates up to an overall coverage of 20 meters.

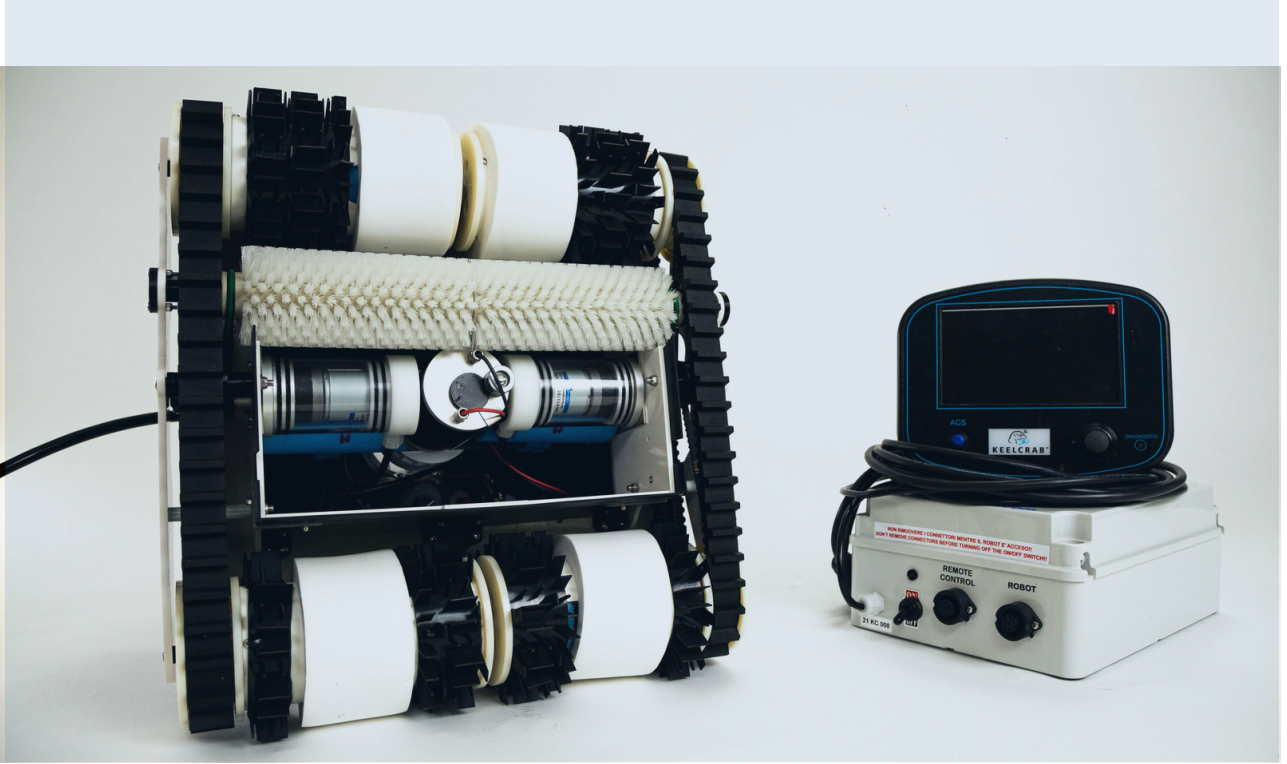

### EFFICIENCY EVERYWHERE

Ultracrab works in salt and freshwater.

## CERTIFIED BRUSHES

KeelCrab is provided with nylon or stainless brushes A.N.C.C.P certified, that guarantees a cleaning process able to do not remove hard matrix antifouling.

Boatowners from all over the world already request KeelCrab service to 300 KeelCrab Points in 30 countries.
